

One of these dogs hides socks. The other hides early-stage lymphoma. Can you tell them apart?

Lymphoma can lurk in dogs without any physical signs. Ask your veterinarian how regular wellness testing can find lymphoma early. So we can confront it early.

The worst type of cancer is the kind that goes undetected.

Now, your routine screening can include a blood test to detect lymphoma early. Which means we can confront it sooner, helping your dog feel better and stay active, plus giving you more quality time together.

Discuss screening for lymphoma with your veterinarian.
